5. Method & limitations

- Data source: YouTube InnerTube API (the same backend the YouTube web player uses). All 655 public uploads on the channel's Videos, Shorts and Live tabs were enumerated and each video's full description and metadata were retrieved (0 fetch errors).
- A link was counted as affiliate/referral when its URL carries commission or invite attribution: referral paths (/refer/, /invite/, /join/, /r/), tracking parameters (?ref=, ?a=, fp_ref=, a_aid=, friend_code=, ?m=), or personal invite codes.
- Counts are occurrences: the same link pasted in 10 descriptions counts 10 times. Distinct-video counts are shown alongside.

- Not counted as affiliate: the creator's own product/funnel links (cash.bot, chasereiner.com, getaichcklist.com, shineranker.com), social profiles, Facebook Messenger m.me?ref= deep links (17x, not commission links), and donation links (Streamlabs, Patreon).
- Unresolved short links that could not be expanded from this environment and may hide affiliate destinations: bit.ly/3fHNTVb (381x, labeled “free checklist”), bit.ly/39bCc48 (2x), and three goo.gl links (1x each).
- Scope: titles + descriptions only. Spoken mentions (transcripts), pinned comments, and community posts were not scanned — YouTube does not expose captions for these videos via the accessible API endpoints from this environment.
- Disclosure observation: 124 descriptions include an ad-blocker warning about affiliate tracking, and 3 descriptions include a “VERIFIED AFFILIATE LINKS” section; a formal FTC-style disclosure statement (“I earn a commission...”) was not found.
