

Oasis Beauty Lounge

SEO • Social Media • Google Business Profile

A public-visibility review of how customers find (and fail to find) your studio online — with a prioritized 90-day fix plan.

BUSINESS	Oasis Beauty Lounge — boutique advanced-facial studio
LOCATION	3225 N 75th St, Ste 110, Scottsdale, AZ 85251 (Old Town)
WEBSITE	oasisbeautyloungeaz.com
PHONE / EMAIL	(602) 901-7816 / oasisspa555@gmail.com
AUDIT SCOPE	Search visibility, Google Business Profile, reviews, listings/citations, social media
METHOD	Publicly observable data only — no logins or internal analytics were accessed

Your studio is excellent. Online, it is nearly invisible.

We audited every public channel a potential client would use to discover a facial studio in Scottsdale. The pattern is consistent: **the business exists online, but it is not findable**. Only three pages of the website are indexed by Google, no social media profiles could be located, no customer reviews were found on any platform, and an active Google Business Profile could not be verified from public search. Meanwhile, similarly-named competitors (Oasis Face Bar, Oasis Beauty Bar) absorb the searches your name should be winning.

Visibility scorecard (0-10, based on publicly observable signals — methodology on p. 9)

Website & technical SEO		3/10
Search visibility (SEO)		2/10
Google Business Profile		1/10
Reviews & reputation		1/10
Listings & citations (NAP)		2/10
Social media presence		0/10

The three issues that matter most

1. Google Business Profile gap **CRITICAL**

No active, review-carrying Google listing could be verified. In local beauty, the Google map pack is where the majority of new-client discovery happens — a missing or bare profile hands that traffic to competitors by default.

2. Zero review footprint **CRITICAL**

We found no reviews on Google, Yelp, Facebook, or booking platforms. For a service judged on trust and results, zero reviews is the single largest conversion blocker — and the fastest one to fix.

3. Brand-name collisions **SERIOUS**

The natural Instagram handle (@oasis_beauty_lounge__) belongs to a salon in Amman, Jordan; the matching .com domain belongs to a med spa in Amarillo, TX; and Oasis Face Bar / Oasis Beauty Bar operate nearby. Customers who search your name are being routed to the wrong businesses.

The good news: every finding in this report is fixable without rebuilding the business. Most items are configuration, claiming, and consistency work — a realistic 90-day effort (plan on p. 7).

PILLAR 1

Website & SEO audit

The Shopify site is live, secure, and mobile-capable — the foundation is fine. The problem: it gives Google almost nothing to rank.

S1 — Only 3 pages indexed **CRITICAL**

Google's index contains just the homepage, /collections/all, and /cart. There are no service pages (facials, peels, cryotherapy), no about page, no location page, no blog. Google cannot rank pages that do not exist.

S2 — Homepage title tag carries no keywords **SERIOUS**

The indexed title is simply "Oasis Beauty Lounge." It should communicate service + city, e.g. *"Oasis Beauty Lounge | Advanced Facials in Old Town Scottsdale, AZ."* This one line is the strongest single ranking signal on the site.

S3 — Cart page is indexed **SERIOUS**

/cart appearing in Google indicates index-hygiene gaps (missing noindex on utility pages). One-third of your indexed footprint is a shopping cart — wasted crawl equity and a poor searcher experience.

S4 — Site blocks non-browser agents (HTTP 403) **SERIOUS**

The site returned 403 Forbidden to every automated fetcher we used. Google renders it, but aggressive bot protection can block SEO tools, link previews, and the AI search crawlers (ChatGPT, Perplexity, AI Overviews) that "best facial near me" queries increasingly flow through. Review Shopify bot-protection settings.

S5 — No authority signals **ISSUE**

No backlinks from local press, directories, or partners were found — even easy local links (Old Town Scottsdale directory, chamber, suite-mates, CareCredit link-back) are missing.

S6 — Unverified technical items **NEEDS ACCESS**

Schema markup, Core Web Vitals, sitemap submission, Search Console and GA4 could not be checked from outside — 30-minute verifications once access is granted.

Keyword opportunities to build pages around

Exact monthly volumes should be pulled with a keyword tool before content work; these targets are chosen from your actual service menu and location.

TARGET KEYWORD	INTENT	PAGE THAT SHOULD RANK	EXISTS TODAY?
facials scottsdale az	High — service + city	Signature facials service page	NO
hydrafacial / hydro facial scottsdale	High — service + city	Hydration facial page	NO
chemical peel scottsdale	High — service + city	Peels page	NO
cryotherapy facial scottsdale	Medium — differentiator	Cryo facial page	NO
lifting / anti-aging facial old town scottsdale	High — signature service	Lifting facial page	NO
esthetician near me / best facial old town	High — map pack	Google Business Profile	GAP

Google Business Profile & local listings

G1 — Active Google Business Profile could not be verified **CRITICAL**

Branded searches surface no Google listing with reviews, photos, or attributes — the profile is unclaimed, unverified, suspended, or too bare to appear. Claiming it is the **#1 action in this report**: the map pack drives more local beauty bookings than any other channel.

G2 — Zero Google reviews **CRITICAL**

Competing facial studios in Scottsdale carry 20–120+ reviews. At zero, you lose ties on every "near me" comparison regardless of how good the service is.

G3 — Shared-suite address risk **SERIOUS**

Suite 110 at 3225 N 75th St is also publicly associated with Aloe Skin Aesthetics (a med spa). Google routinely merges or suppresses same-category listings at one address. Your listing needs a distinct suite designation, its own phone (you have one), consistent NAP, and suite-signage photos to survive verification.

G4 — Unusual hours must be entered deliberately **ISSUE**

You are open Sunday and closed Saturday — the reverse of most competitors. That is a real advantage ("facial open Sunday Scottsdale") but only if every listing states it correctly; a defaulted Sat/Sun schedule would cause missed visits and negative reviews.

Citation & listing coverage (NAP consistency)

PLATFORM	STATUS FOUND	ACTION
Google Business Profile	UNVERIFIED	Claim/verify, complete 100% of profile, add booking link
CareCredit provider locator	LISTED	Confirm NAP matches exactly; add website link if missing
Yelp	MISSING	Create listing (heavily used for AZ spa searches)
Facebook Business Page	MISSING	Create — also required for Instagram business linkage & ads
Bing Places	MISSING	Import from Google after GBP is verified
Apple Maps (Apple Business Connect)	MISSING	Register — iPhone-heavy Scottsdale market
Nextdoor	MISSING	Claim business page; neighborhood word-of-mouth
Booking marketplaces (Fresha / Booksy / StyleSeat)	MISSING	List on one — competitors are discoverable there today
YellowPages / MapQuest / data aggregators	MISSING	Push consistent NAP via aggregator once GBP is live
Old Town Scottsdale directory	MISSING	Request listing — free local link + citation

Review engine (first 90 days): QR card at checkout linking straight to the Google review form + same-day SMS follow-up. Target 20–30 reviews with 100% owner replies — typically enough to move a new listing into the local pack.

Social media audit

- M1 — No social profiles found on any platform

CRITICAL

Searches across Instagram, Facebook, TikTok, Pinterest, and YouTube found no accounts for this business. Beauty is the most visual, social-driven local category there is — competitors win clients with before/after content while the studio has no presence at all.
- M2 — The obvious handles are already taken by strangers

SERIOUS

Anyone searching your exact name on social lands on unrelated businesses:

HANDLE / PROPERTY	WHO ACTUALLY OWNS IT	RISK
@oasis_beauty_lounge__ (Instagram, 18K followers)	Salon in Amman, Jordan	Clients follow/DM the wrong account
oasisbeautylounge.com + "Oasis Beauty Lounge LLC" Facebook	Med spa in Amarillo, TX	Wrong pricing, wrong bookings, brand confusion
Oasis Face Bar (Scottsdale) / Oasis Beauty Bar (Phoenix)	Local competitors with active social + reviews	They absorb "oasis facial scottsdale" searches

Recommendation: register @oasisbeautyloungeaz (matching your domain) on Instagram, TikTok, Facebook, Pinterest, and YouTube *this week*, even before posting begins — handle squatting is cheap insurance, and the consistent "-az" suffix becomes the disambiguator across every channel.

Recommended platform plan (beauty-niche priority order)

PLATFORM	PRIORITY	CADENCE	CONTENT FOCUS
Instagram	1 — primary	3–4 posts/wk + daily stories	Before/after (with written client consent), treatment clips, results close-ups
Google Business posts	2	1–2/wk	Offers, openings, seasonal skin tips — feeds the map listing directly
TikTok	3	2–3/wk	Treatment ASMR, skin education, "what I'd do for your skin type"
Facebook Page	4	Mirror IG	Required for reviews, local groups, and future ads; low extra effort
Pinterest / YouTube Shorts	5 — later	Repurpose	Evergreen skincare content; compounding search traffic

Content pillars that fit this studio

- **Proof:** before/after texture, lifting, and hydration results (consent-based).
- **Education:** which of the three signature facials fits which skin goal — mirrors the site's own framing.
- **Differentiators:** Sunday availability, boutique 1-on-1 setting, CareCredit financing for treatment plans.
- **Local:** Old Town Scottsdale partnerships, neighborhood tags, geo-hashtags.

Effort reality check: this plan is ~3–4 hours/week if content is captured during normal treatments (film once, post five times). The first 90 days aim for presence and consistency, not virality.

ACTION PLAN

90-day roadmap

Days 1-30 — Claim, fix, and stop the bleeding

#	ACTION	IMPACT	EFFORT
1	Claim + verify Google Business Profile; resolve shared-suite conflict; 100% profile completion (categories, services, hours incl. Sunday-open, photos, booking link)	VERY HIGH	2-4 hrs
2	Launch review engine: QR card at checkout + same-day SMS ask; owner replies to every review	VERY HIGH	1 hr setup
3	Register @oasisbeautyloungeaz on IG / TikTok / FB / Pinterest / YouTube	HIGH	1 hr
4	Rewrite homepage title/meta with service + city; noindex /cart	HIGH	1 hr
5	Install GA4 + Google Search Console; submit sitemap	HIGH	1-2 hrs

Days 31-60 — Build the surface area

#	ACTION	IMPACT	EFFORT
6	Publish 4-6 service pages (lifting, hydration, texture, peels, cryo) each targeting one keyword from p. 3	VERY HIGH	1-2 wks
7	Create Yelp, Facebook, Bing, Apple Maps, Nextdoor listings with identical NAP	HIGH	3-4 hrs
8	Begin Instagram cadence (3-4/wk) + weekly Google post	HIGH	3-4 hrs/wk
9	Add LocalBusiness/DaySpa schema + review Shopify bot-protection allowlist	MEDIUM	2 hrs

Days 61-90 — Compound

#	ACTION	IMPACT	EFFORT
10	Local links: Old Town directory, chamber, suite partners, CareCredit profile link, 1-2 local press/blog features	HIGH	Ongoing
11	List on one booking marketplace (Fresha or Booksy) to capture marketplace demand	MEDIUM	2-3 hrs
12	Publish 2 blog/education pages; start TikTok repurposing	MEDIUM	4 hrs
13	Checkpoint: 20-30 Google reviews, 10+ indexed pages, map-pack appearance for branded + 1 service query	90-day success criteria	

Sequencing logic: GBP + reviews come first because they convert existing demand immediately; SEO pages come second because they need weeks to rank; social compounds last but builds the moat competitors can't copy — your actual results.

Full tracking variables — current state

Every variable this program tracks, with its state as of July 19, 2026. OK = verified healthy • ISSUE = verified problem • MISSING = verified absent • TBD = requires account access or tool run to measure.

Website & technical

VARIABLE	VALUE
Domain	oasisbeautyloungeaz.com OK
SSL / HTTPS	Active OK
Platform	Shopify OK
Pages indexed	3 ISSUE
Service pages	0 MISSING
Blog	None MISSING
Homepage title keywords	None ISSUE
Cart noindex	Not set ISSUE
Bot-protection 403s	Yes ISSUE
Schema markup	TBD
Core Web Vitals	TBD
XML sitemap submitted	TBD
GA4 installed	TBD
Search Console	TBD
Meta pixel / TikTok pixel	TBD
Backlinks / referring domains	~0 found ISSUE
Domain registrar / renewal	TBD

Google Business Profile

VARIABLE	VALUE
Listing claimed/verified	UNVERIFIED
Primary category	TBD
Services menu	TBD
Photo count	TBD
Google posts	None found MISSING
Q&A monitored	TBD
Booking link on listing	TBD
Messaging enabled	TBD
NAP consistency	1 citation only ISSUE
Shared-address conflict	Aloe Skin Aesthetics ISSUE
Hours accuracy (Sun open / Sat closed)	Verify everywhere CHECK

Reviews & reputation

VARIABLE	VALUE
Google reviews / rating	0 found MISSING
Yelp reviews	No listing MISSING
Facebook reviews	No page MISSING
Review response rate	N/A TBD
Review ask process	None found MISSING

Full tracking variables — continued

Social media

VARIABLE	VALUE
Instagram account / followers	None found MISSING
Facebook page / followers	None found MISSING
TikTok account	None found MISSING
Pinterest / YouTube	None found MISSING
Handle @oasisbeautyloungeaz available	Register now ACT
Posting cadence	0/wk MISSING
Engagement rate	N/A TBD
Link-in-bio / booking funnel	N/A MISSING
UGC / before-after consent process	TBD

Conversion & ops (owner input needed)

VARIABLE	VALUE
Booking system / CRM	TBD
Email & SMS list sizes	TBD
Automated follow-up	TBD
Call / DM / form conversion values	TBD
Avg lead-flow & marketing budget	TBD
Ad accounts (Google/Meta) active	No evidence LIKELY NONE

How to close the TBDs: a 20-minute working session with account access (Google, Shopify, booking system) converts every TBD above into a measured baseline — the "before" snapshot the 90-day plan is graded against.

Methodology, sources & scope

How this audit was performed

All findings come from publicly observable data collected July 19, 2026: search-engine indexes and snippets, public directory listings, and platform searches. No website admin, analytics, ad accounts, or private data were accessed. The website itself returns HTTP 403 to automated fetchers (noted as finding S4), so on-page checks were reconstructed from search-index data; items that require inside access are marked TBD rather than guessed.

How scores are calculated

Each pillar is scored 0–10 against a standard local-business checklist (presence, completeness, consistency, activity, authority). Scores are directional diagnostics for prioritization — not industry-benchmarked metrics. Zero reviews, zero social profiles, and 3 indexed pages are verified counts; "unverified" means the item could not be confirmed to exist from public search, which itself indicates a visibility problem.

Sources

- oasisbeautyloungeaz.com (homepage, /collections/all, /cart — via search index)
- CareCredit provider locator — carecredit.com/doctor-locator/scottsdale-az/oasis-beauty-lounge-843fgx
- Search-index results across Google/Bing for brand, address, phone, and email queries
- Platform searches: Instagram, Facebook, TikTok, Yelp, Nextdoor, Groupon, Fresha, YellowPages, MapQuest
- Address cross-reference: public listings for 3225 N 75th St, Scottsdale (LoopNet, Vitals, Waze, tenant sites)

Disambiguation note

This report is careful to exclude similarly-named but unrelated businesses: the Amarillo, TX med spa at oasisbeautylounge.com, the Amman (Jordan) salon at @oasis_beauty_lounge__, and the separate local operators Oasis Face Bar and Oasis Beauty Bar. Any third-party report that cites those properties as yours is measuring the wrong business.

Suggested next step

A 20-minute call is enough to (1) confirm Google Business Profile ownership status, (2) collect the TBD variables on page 7, and (3) green-light the Days 1–30 actions — the two critical fixes (GBP + reviews) can be live within a week.
